# MIX and Match Digestion

- |  |                         |
|--|-------------------------|
| 1. BILE IS PRODUCED IN                         | A. stomach              |
| 2. BILE IS EMPTIED IN                          | B. CATALYSTS            |
| 3. BILE IS STORED IN                           | C. glucose              |
| 4. IS WHERE THE WATER REABSORPTION TAKES PLACE | D. large intestines     |
| 5. IT CONTAINS VILLI                           | E. small intestines     |
| 6. APPENDIX IS A PART OF THE                   | F. Fats                 |
| 7. IS WHERE THE FOOD ABSORPTION TAKES PLACE    | G. Duodenum             |
| 8. CONTAINS STRONG (HYDROCHLORIC) ACCID        | H. The gallbladder      |
| 9. PROTEINS ARE MADE OF                        | I. The liver            |
| 10. PROTEIN SYNTHESIS HAPPENS IN               | J. Carbohydrates        |
| 11. LIPASE is produced in                      | K. AMINO ACIDS          |
| 12. Amylase breaks down                        | L. Proteins             |
| 13. Pepsin breaks down                         | M. Pancreas             |
| 14. Lipase breaks down                         | N. glucose              |
| 15. speed up chemical reactions                | O. The small intestines |
| 16. Substrate (Starch) + Enzyme (Amylase) =    | P. RIBOSOMES            |
| 17. Amylase breaks down starch into            | Q. Large intestines     |
