Math 1 Review

Across

- 4. more than one term
- **5.** lines that intercepts once forming a right angle
- 7. ordered pairs
- 9. whole numbers
- 14. equation that tells the variable
- **18.** how many times a number is used in a multiplication
- **21.** a number or variable in an equation
- 22. the number above the coefficent
- 23. greatest common factor
- 24. one term
- **26.** the number under the radical symbol

- **28.** y-axis
- 29. three terms
- 31. equations with two inequalities
- **32.** a symbol that indicates the square root of the following number
- 33. the highest point
- **34.** greater than, less than, or equal to
- 35. a U shape on a graph

Down

- 1. the highest point on a graph
- 2. equation without a square root
- **3.** a value that goes up at a constant rate
- 6. where the line crosses the y axis
- 8. x-axis

- 10. a number multiplied by itself
- 11. lines that never touch
- **12.** inequality which involes a linear function
- **13.** line that goes through a parabola making it symmetrical
- **15.** slope
- **16.** expression with one or two variables
- **17.** the origin
- 19. where the line crosses the x-axis
- 20. one after another
- 25. the number before a variable
- 27. two terms
- 30. the lowest point on a graph
