

Math 2 Crossword puzzle

Across

- 1. Line that is perpendicular to a segment at its midpoint
- 3. 2 angles whose measures have a sum of 90 degrees
- 8. triangle that contains a right angle
- 10. Angle whose measure = 90 degrees
- 12. The sum of the angles of a Triangle are 180 degrees.
- 14. point that divides a segment into 2 congruent segments
- 16. 2 lines on the same plane that never intersect

- 18. Any line which intersects 2 other lines or line segments
- 19. 2 angles whose measures have a sum of 180 degrees
- 20. segments whose lengths are equal

Down

- 2. The sum of 2 interior angles of a triangle equals the remote exterior angle
- 4. non-adjacent angles formed by 2 intersecting lines
- 5. line (or segment) that intersects the segment at its midpoint

- 6. 2 geometric figures that have the same size and shape
- 7. lines that intersect to form a right angle
- 9. ray that divides an angle into 2 congruent angles
- 11. Any line which intersects 2 other lines or line segments
- 13. angles whose measures are equal
- 15. ray that divides an angle into 2 congruent angles
- 17. 2 adjacent angles whose non-common sides are opposite rays
