

Name: _____ Date: _____ Period: _____

Math Criss Cross Puzzle

Across

2. the value of the expression $b^2 - 4ac$ for a quadratic equation

6. a set of ordered pairs

10. the shape of the graph of a quadratic function

12. the highest power found in a polynomial

14. the directions of a graph as you move away from the origin

15. quantity whose value does not change

16. ratio of vertical change to horizontal change in a non-vertical line; change in y over change in x

19. the real numbers AND the imaginary numbers

21. a change made to the values of a function which translates, reflects, rotates or dilates a graph of the function

23. a polynomial of three terms

24. a relation in which each element in the domain corresponds with exactly one element in the range

25. a point where the graph of a function changes direction

Down

1. a polynomial of two terms

3. the line that divides a figure into two parts that are mirror images

4. number pairs where the sign of the radicals or the imaginary numbers are opposites

5. the strength of a relationship between two data sets

7. the coefficient of the term of highest degree in a polynomial

8. an expression consisting of the sum of one or more terms in which each is the product of a constant and a variable raised to an integer power

9. flip of a graph across an axis or a line

11. the shift of a graph of a function horizontally, vertically or both

13. in a square matrix it is a real number describing the matrix determined by $ad - bc$ in a 2×2 matrix

17. the numerical factor in a term

18. multiplication of all y -values of a function by a factor greater than 1

20. the set of all inputs in a relation (usually x)

22. a set of two or more equations using the same variables
