

# Math Crossword Puzzle

**Across**

- 2. The amount by which a regular price is reduced
- 7. Having the same measure
- 9. The distance across a circle through its center
- 13. A branch of mathematics that involves expressions with variables
- 14. The set of x-coordinates in a relation
- 15. Lines that lie in the same plane
- 18. The two sides of a right triangle that form the right angle
- 19. The distance from the center of a circle to any point on the circle
- 20. The set of y-coordinates in a relation
- 21. The side opposite the right angle in a right triangle

23. A term without a variable

- 25. A transformation that enlarges or reduces a figure by a scale factor
- 26. A line segment whose endpoints are vertices that are neither adjacent nor on the same face

**Down**

- 1. A way to show the arrangement of data values
- 3. One of two congruent halves of a sphere
- 4. A parallelogram with four congruent sides
- 5. A number, a variable, or a product of a number and one or more variables
- 6. The distance around a circle
- 8. The point of intersection of the x-axis and y-axis in a coordinate plane

10. A statement or conjecture that can be proven

- 11. The numerical factor of a term that contains a variable
- 12. A parallelogram with four congruent sides
- 16. To fall in a straight line
- 17. Any set of ordered pairs
- 22. Lines that never intersect no matter how far they extend
- 24. The number(s) that appear most often in a set of data
