

# Math Definitions

## Across

4. Consisting of several terms
5. A \_\_\_\_\_ is defined as any expression containing a radical symbol.
6. involving the second and no higher power of an unknown quantity or variable
8. Whole numbers and a number times a variable.
9. An \_\_\_\_\_ is a mathematical sentence that uses symbols such as  $<$ ,  $>$ , and  $=$  to compare two quantities.
10. The \_\_\_\_\_ of a set of data is the middle most number in a data set.

## Down

1. A function whose value is a constant raised to the power of the argument, especially the function where the constant is  $e$ .
2. The number which appears most often in a set of numbers.
3. A \_\_\_\_\_ is a number that can be expressed as the quotient or fraction of two integers, a numerator and a non-zero denominator.
7. The \_\_\_\_\_ is the average of the numbers of a data set.
