## Math Terms

## **Across**

- 2. A series of numbers placed at fixed distances on a graph to help label the graph.
- 5. A graph that uses line segments to show the data change over time.
- 7. A grid formed by a horizontal line called the x-axis and a vertical line called the y-axis.
- **10.** A series of numbers placed at fixed distances on a graph to help label the graph.

- 11. The horizontal number line on a coordinate plane.
- **12.** The first number in an ordered pair; tells the distance 6. The vertical number line to move right or left from (0,0)

## Down

- 1. The second number in an ordered pair; tells the distance to move up or down from (0,0)
- 3. A pair of numbers used to locate a point on a grid.

- 4. A graph that uses line segments to show how data changes over time.
- on a coordinate plane.
- 8. A pair of numbers used to locate a point on a grid.
- **9.** Information collected about people or things, often to draw conclusions about them.
