# Math Terms

## Across

- 2. Number, variable, or product of a number and one or more variables with whole number exponents
- 3. The number part of a term with a variable part
- 4. The set of all the rational and irrational numbers
- 6. An equation that contains two or more variables
- 14. Collection of all input values
- 15. Measure of the likelihood that the event will occur (favorable and unfavorable)

16. Terms that have the same variable parts

17. A letter used to represent one or more numbers

18. Coefficient of the first term in a polynomial

19. Two lines that intersect each other and form a right angle

20. A property used to find the product of a number and a sum or difference

## Down

1. A number that can be written as a quotient of two integers

5. The point on the segment that is equidistant from the endpoints

7. Rate per ONE given unit

8. A polynomial with three terms

9. Two separate inequalities joined by AND or OR

10. Same radicand

11. The relationship between two data sets

12. Number or expression that is used as a factor in repeated multiplication

13. Possible result of an experiment
