

# Math and Science Glossary

## Across

3. An animal with a backbone  
 4. The bending of light  
 12. The distance a number is from zero on the number line  
 14. Number after another number that tells you how many times to multiply a number by that same number  
 15. Heat and pressure causes rock to change  
 17. Set of all whole numbers and their opposites  
 18. How much mass is in an object or a given amount of volume

19. Mixture in which a substance dissolves evenly  
 20. How many times something occurs or vibrates

## Down

1. Is the interior, inside, or covering of a shape  
 2. One of 2 or more numbers that when multiplied together make a product  
 5. Breaking down and changing of rocks.  
 6. Plants that have tubes to move water up and down the stem. Tend to be taller and reproduce using seeds or spores

7. Amount of salt in the water  
 8. number in front of the variable  
 9. Has variables, numbers, operations, and an equal sign  
 10. Is made up of atoms of 2 or more elements joined together  
 11. A measure of an amount of liquid  
 13. Has variables, numbers, operations, and no equal signs  
 16. An equation that uses less than or greater than instead of equal sign
