## Math vocabulary

## Across

- 1. Two angles that share a common side and vertex
- **8.** A line, a ray that divide the angle into two equal parts
- **12.** Two lines intersecting at 90°
- **17.** Two lines that are equal distance and never intercept
- **19.** a coordinate
- **21.** a part of a line with only one endpoint
- 23. An angle that is less than 90°
- **24.** An angle that is 90°
- **26.** a part of a line with two endpoints

- **27.** Two adjacent angles that equal  $90^{\circ}$
- **28.** adjacent angles that are supplementary
- 29. middle point of segment

## <u>Dowr</u>

- 2. made of a series of points
- 3. intersection of two rays
- 4. An angle that is more than 90°
- **5.** the sum of the parts are equal to the whole
- **6.** the sum of Two angles that equal  $180^{\circ}$
- 7. Some of the parts equal whole(angles)
- 9. a space between points

- **10.** A line, segment or Ray perpendicular to a segment at its midpoint
- 11. points on the same plane
- **13.** Two or more segments with the same length
- **14.** a segment, line or plane that intersects at its midpoint
- **15.** a flat surface with three or more points
- **16.** Two intersecting lines that form two pairs of angles directly across from each other that are equal measure
- 18. Two angles with the same measure
- 20. common endpoint of any angle
- 22. An angle that is 180°
- 25. points on the same line
