

Matter and Cell

Across

- 2.** Term for temperature at which Solid changes into liquid
- 4.** extra outer covering in plant cell
- 10.** Term for hidden heat
- 11.** matter whose molecules are tightly packed
- 12.** Anything that have both mass and volume

- 13.** State of matter which have high diffusion rate
- 14.** The intermixing of two or more substances by their own
- ## Down
- 1.** Term for outer boundary of the cell
- 3.** Fundamental unit of life
- 5.** Change of matter directly from Solid to Gas

- 6.** power house of the cell
- 7.** Term for content present in the cytoplasm
- 8.** It leaves cooling effect
- 9.** Term for jelly-like substance present in the Cell
