

Matter and Materials: Atoms

Across

2. contains only protons and neutrons

5. has the chemical symbol Au

10. Sub-atomic particles with negative charge

11. has a atomic mass of 58.5g/mol

13. Sub-atomic particles with positive charge

14. the path of electrons

15. is the only liquid metal on the periodic table

Down

1. Krypton is a gas

3. can be divided into groups and periods

4. has a atomic mass of 14g/mol

6. The element named after Albert Einstein

7. tritium is aof hydrogen

8. Sub-atomic particles with no charge

9. contains protons, neutrons and electrons

12. Cell phone batteries are made of
