

Measurement and Density

Across

2. _____ is how close a measurement is to the true value

5. _____ Is the amount of matter in an object

8. We always read from the bottom of the _____ in the graduated cylinder

9. _____ is the downward force of an object due to gravity

10. _____ is the amount of space taken up by a 3D object

12. What is used to measure time?

13. What is used to measure the length of straight lines

Down

1. What is used to measure the length of short curved lines?

3. density is calculated by placing _____ over Volume

4. _____ is the amount of space taken up by a 2D shape

6. _____ is the mass per unit volume

7. A _____ is used to measure small volumes accurately

11. 1.0g/cm³ is the density of _____
