

Mental Jump Games!

Across

8. inclination to having felt an event to be predictable

9. quick decisions through mental shortcuts; how similar something is to something else (stereotype)

10. abstract idea, general notion

Down

1. cognitive bias, involves tendency to see objects as only working in a particular way

2. tendency to cling to one's initial belief even after receiving new information

3. belief that chances of something happening with a fixed probability become higher or lower as the process is repeated

4. thinking about thinking

5. one suddenly realizes how to solve a problem

6. tendency to approach situations in a certain way because that method worked in the past

7. try everything until you get it
