# Metals

## Across

- 3. Bi-product of magnesium + hydrochloric acid
- 6. A list of metals that describes their reactivity by order
- 7. Metal vital for plant growth, below chromium in the periodic table
- 9. Cu
- 11. Metal used as bomb casing in WW2

## Down

- 1. Magnesium + Oxygen
- 2. Metal with the highest melting point
- 4. An alloy of iron and other elements, primarily carbon, that is widely used in construction
- 5. Transition metal used to coat steel cans
- 8. Period six of the alkali metals
- 10. The only metal that's liquid at room-temperature
