

Metals and Acids

Across

3. It's relative atomic mass is 56
 7. The atomic number is 36
 9. It's relative atomic mass is 1
 10. It's atomic symbol is K
 13. Highly reactive metals react with it

14. We breathe is every day

16. It is used in the construction of an drinking cans

Down

1. The atomic symbol is X
 2. An acid used for cooking
 4. It is used to make wires

5. It is the most reactive metal

6. It is used to make jewellery

8. The atomic symbol is Be

11. The atomic symbol is W

12. It's a metal, but is a liquid

15. It's atomic number is 20
