

Meteorology

Across

- 5. cloud that has a vertical development
- 7. process on converting liquid to gas
- 11. boundary between two adjoining air masses
- 12. condition of air that is more highly concentrated than normal

- 13. form water that falls to the ground

Down

- 1. state of air that contains the maximum quantity of water vapor
- 2. energy absorbed or released during a change in state
- 3. conditions of water droplets still in liquid for below 0 degrees celcius

- 4. tiny bits of particulate matter
- 6. conversion of a solid directly to a gas without going throu the liquid state
- 8. one of the three high cloud types, thin
- 9. clouds that are sheets or layers in the sky
- 10. water vapor in the air
