## Mirrors and Lenses

## <u>Across</u>

- **5.** The point at which rays parellel to the opticle axis reflect and meet.
- **7.** An image of a distant object caused by refraction of light
- **8.** An imaginary line that divers mirrors In half
- **9.** A flat sheet of glass that has a smoothe silver colored coating on one side
- **10.** Thinner at the center than at the edges

## <u>Down</u>

- 1. When parallel rays of light hit an uneven surface
- **2.** Occurs when parallel rays of light hit a smoothe surface.
- **3.** An image that forms where light seems to come from
- 4. When light rays actually meet
- **6.** A curved piece of glass or other transparent material that refracts light
