

Name: _____

Date: _____

Mitochondria

Across

- 2. Cells with more mitochondria
- 4. fatty acids and this are broken down to create ATP
- 6. Type of respiration used by mitochondria
- 10. Mitochondria are evolved from these

11. Adenosine

Triphosphate is created using nutrients and this element

12. Mitochondria have two of these

13. Name of the cycle used to convert oxygen to carbon dioxide and usable energy

Down

1. Mitochondria replicate using

3. Adenosine

Triphosphate is also known as

5. Numerous folds of the inner membrane

7. Mitochondrial division is stimulated by

8. Mitochondria use oxygen to create this

9. The outer membrane allows the passage of these
