

Name: _____

Date: _____

Mitosis

Across

1. 3rd stage of cell division

6. thread like structure that holds genetic DNA

7. 1st stage of cell division

9. nuclear membrane forms around chromosome sets and chromosomes unwind

10. holds two chromatids together

11. each chromosome attaches to a spindle fiber at its centromere

12. contains chromatid and centromere

Down

2. structures that help pull apart the cell

3. 2nd stage of cell division

4. strands of combined chromatin

5. chromosomes condense; centriole pairs move to opposite ends; spindle fibers form; nuclear envelope breaks down

8. the chromosomes centromere splits, pulling the chromatids apart; chromosomes drawn by spindle fibers to opposite ends of cell
