

Module 32 & 33

Across

- 2.** cylindrical structures associated with kinetochores; help form mitotic spindle
- 4.** protein structures at centromeres
- 5.** form chromosomes

- 8.** doesn't move to other areas
- 9.** division of cytoplasm
- 10.** only in plants, becomes cell wall
- 11.** only in animal cells, becomes cell membrane
- 12.** molecules that signal division

Down

- 1.** cells need something to attach to/grow on
- 3.** spreads
- 6.** division of nucleus
- 7.** abnormal growth of body cells
