

# Molecular Genetics

## Across

- 3. Change in DNA
- 7. The genetic code for all living organism
- 8. Double Helix
- 9. Carries the genetic message from the nucleus
- 10. Reading the genetic code

## Down

- 1. Where proteins are made
- 2. One molecule of DNA
- 4. Transports proteins to the ribosome
- 5. The cause of mutations
- 6. A series of 3 letters that code for an amino acid
