

Name: _____

Date: _____

Moon

Across

3. a set of events that happen over and over in the same pattern
7. when the moon looks like a half circle
8. only a thin slice of the moon is visible
9. when the moon is between the new phase and the full phase. More of the moon is visible every day. The curve of the light is on the right.
10. the path of one object in space around another
11. how a changing object looks during one part of a cycle

Down

1. the moon looks like a completely round circle. It rises in the evenings at sunset and sets at dawn
2. the moon looks "fat" with a bulge on one side. More than half of the circle is visible.
4. something that involves the moon
5. when the moon is between the full phase and the new phase. Less of the moon is visible every day. The curve of the moon is on the left.
6. none of the moon is visible. The new moon rises and sets with the sun.
