

Mountain Bike Parts

Across

3. Connect front chainring to the cassette, also worn by all rappers
 5. Metal connectors between the rim and hub, also where a playing card is inserted so it sounds like you're driving a motorcycle
 8. Piece that connects the pedals to the bottom bracket, also what you call someone before they have had their morning coffee
 9. Connects saddle to the frame, also rhymes with meatpost
 13. Shock on the front fork, also you would be crazy to ride the trails without this
 16. Only stopping mechanism besides crashing, also ya that pretty much sums it up

17. Metal part of wheel, also what all dudes upgrade on their cars/pickups/hotwheels

18. Used to switch gears, when done wrong could make going up a hill a pain in the a\$#

Down

1. Holds all of the back gears, also what you used to listen to all your music on GenZers wouldn't understand
 2. Shock placed underneath the saddle, also what makes it feel like you're riding in a Cadillac
 4. Hold all of the important parts and connect your hands to the bike, also a fabulous mustache style all riders need
 6. Squishy part where your hands go, also highly customizable with lots of color options, unless you're boring...

7. Connect the handlebars to the frame, also major part of a plant that holds it all together

10. What you put your feet on, also what causes serious shin bleeding and bruising when control is lost

11. Base of the bike that everything is built around, also holds pictures and everyone has too many even though they've never actually bought them

12. Rubber part of bike wheel, also this is pretty obvious so you're on your own

14. Inner part of wheel, also what your crazy uncle drags you in behind a boat and you hold on for dear life and scream bloody murder

15. What you sit on, also what you use to sit on horses
