

Moving Straight Ahead Vocabulary

Across

4. Having a constant ratio to another quantity; must go thru (0,0)

8. The value of this variable depends on the other value

10. Having the same value

11. A symbol, commonly an alphabetic character, that represents a number

12. The point where the graph crosses the y-axis

13. The value or values that make an equation true

Down

1. A mathematical statement that contains an equal sign

2. The number that expresses the steepness of a line

3. The point where the x and y axes intersect on a coordinate graph; the point (0,0)

5. A statement that two quantities are not equal

6. The value of this variable determines the value of the other.

7. A number that is multiplied by a variable in an equation.

9. A relationship in which there is a constant rate of change between two variables
