

Name: _____

Date: _____

Muscular System

Across

5. striated, 1 nucleus
 7. attachment site for a less movable bone
 9. bending a body part
 10. striated, multi-nucleated
 11. Not striated, 1 nucleus
 16. Develops when skeletal muscles are used strenuously for several minutes
 17. turning the sole of the foot laterally
 18. movement, stability, control of body openings and passages, heat production

19. Rapid production of energy

20. extending a body past the normal anatomical position

Down

1. Small amounts of ATP
 2. Attachment site for more moveable bone
 3. moving a body part away from the anatomical position
 4. Uses body's store of glucose
 6. A type of chemical energy, needed for muscle contractions

8. One contraction immediately followed by another

12. condition in which a muscle has lost its ability to contract

13. Single brief contraction

14. straightening body part

15. turning the sole of the foot medially
