# My Math Vocab.

## Across

- 2. a fundamental relation in Euclidean geometry among the three sides of a right triangle.
- 3. Two angles that add up to 180 degrees
- 5. Angles across from each other
- 6. A line that crosses two or more lines
- 14. To slide a shape or image
- 16. A shape with 3 sides
- 17. The size on the outside
- 18. Magnitude and distance
- 20. A shape formed by two lines with a common vertex

- 22. A long thin mark

- 24. Same shape different size
- 26. Two angles that have a same common side
- 27. Using translation, rotation, and reflection
- 28. The angle on the inside

## Down

- 1. A shape with 4 corners
- 4. To mirror an image
- 7. Same size same shape
- 8. Two lines that go the same distance but never intersect
- 9. A final part stage of a period or process

- 10. Angles on the outside

- 11. Instinct
- 12. To fold something in half and the half being the same as the other half
- 13. An exact location
- 15. Part of the circumference of a circle
- 19. A line that holds two end points
- 21. Starts at one point and never ends
- 23. The size in the inside
- 25. A circular movement
