

Name: _____

Date: _____

Nervous System Crossword Puzzle

Across

3. Neuroglia that make up the myelin sheath
 8. Neuroglia that maintain cerebrospinal fluid
 9. The pathway a nerve impulse travels after leaving the cell body of a neuron
 10. Create a supportive framework for neurons
 11. Neuroglia that fight infections in the CNS

12. Neuroglia that wrap around capillaries
 13. Neurons with 1 process
 14. Involuntary muscle control
 16. All nerves other than brain or spinal cord
 17. Voluntary muscle control
 18. Send impulses away from the CNS
 19. Neuroglia in the PNS that produce myelin sheaths

Down

1. Neurons with 2 processes
 2. Made of the brain & spinal cord
 4. Allows the nerve impulse to jump moving more quickly
 5. Send impulses towards the CNS
 6. Neurons with many processes in which case most neurons are this type
 7. Neuroglia in the PNS that support neuron cell bodies
 15. Part of the neuron that receives the nerve impulse from senses

Word Bank

Axon	Central Nervous System	Neuroglia	Schwann Cells
Multipolar Neurons	Unipolar Neurons	Afferent Nerves	Nodes of Ranvier
Bipolar Neurons	Peripheral Nervous System	Ependymal Cells	Oligodendrocytes
Microglia	Astrocytes	Autonomic Nervous System	Efferent Nerves
Somatic Nervous System	Satellite Cells	Dendrites
