# Neuron and Neuroglial cells

## Across

6. What produces the myelin sheath in the CNS

7. Connects the blood vessels to neurons

9. What part transmit signals the length of the neuron

10. Neuroglia cell that forms a membrane

12. Which neuroglia cells digest debris or bacteria?

13. Neuroglial cells are what kind of cells.

## Down

1. Fatty material that speeds up the passage of nerve impulses

2. What is the most common type of neuron?

3. Cells that produce the Myelin sheath in the PNS

4. Recieves messages and conducts impulses towards the cell body

5. How is information passed to the dendrites of the next neuron?

8. What is the cell body of the neuron cell?

11. What does the cell body contain?
