

Name: _____ Date: _____ Period: _____

Nomenclature Rules

Across

2. how do represent the number of atoms present in a covalent compound?
3. prefix for the number 7
7. prefix for the number 5
10. prefix for the number 1
11. prefix for the number 4
12. prefix for the number 8
13. prefix for the number 9
15. what follows after metal when naming a single charge compound

16. prefix for the number 6

18. prefix for the number 3

19. what does the compound have to end with in a single charge compound

Down

1. what charge does the atom get when it gains or loses an electron
4. what do you have go by when listing nonmetals in covalent compounds?

5. When naming a polyatomic ion, what comes before the anion in the name?

6. what do you represent the cation charge with in a transitional ion compound?

8. what do you not use to name the first element

9. prefix for the number 10

14. What ion compound do you not change the name of?

17. prefix for the number 2
