

# Nonverbal Communication

## Across

3. The use of gestures accompanied by words to enforce the message  
 4. The way in which individuals carry themselves- erect, slumping  
 6. The third spatial zone which ranges from 4 feet to about 12 feet, this zone usually encompasses business communications  
 11. Unconscious bodily movements in response to the environment  
 12. A function of nonverbal behavior that influences the flow of communication

13. The fourth spatial zone which is any distance over 12 feet, often used in classrooms and public spaces that require speakers because of the audience size, two-way communication is almost impossible at this distance  
 14. Nonverbal behaviors that match the thoughts and emotions the communicator is expressing in words  
 15. Messages expressed without words

## Down

1. Messages that do not agree- within verbal and nonverbal communication  
 2. Body position and motion

5. The second spatial zone which ranges from 18 inches at its closest to about 4 feet at its farthest.  
 7. Adding inflection to certain words when spoken to add nonverbal emphasis  
 8. Facial expressions that take the place of words when communicators are reluctant to express their feelings in words  
 9. The degree to which we face towards or away from someone with our body, feet, and head  
 10. The first of Hall's spatial zones which begins with skin contact and extends about 18 inches
