# Nutrition

## Across

6. One glycerol and three fatty acids  
 10. Joining together of small molecules to form larger ones  
 14. Essential for life  
 15. Bendy bones deficiency  
 18. Something used to keep the comparison staying the same  
 19. Bleeding gums deficiency  
 20. To test for protein-reagent

22. Mineral in plants: calcium and magnesium. What is the source?

23. Many sugar units  
 24. The chemicals found in living things  
 25. To test for fat - reagent

## Down

1. Water soluble vitamin  
 2. Liquid lipids at room temperature  
 3. To test for starch - reagent  
 4. To test for reducing sugars - reagent  
 5. Fat soluble vitamin

7. Mineral in animals - source: dairy products

8. The basic unit of a protein

9. The structure of a protein

11. C<sub>6</sub> H<sub>12</sub> O<sub>6</sub>

12. Breaking down of large molecules into smaller ones

13. A component of a plant cell walls

16. Solid lipids at room temperature

17. Mineral in animals - source: red meat

21. One glycerol, two fatty acids and a phosphate group
