# Ocean Life and salinity

## Across

- 1. rapid decrease in temperature with depth
- 5. involves feeding on a variety of animals
- 10. all surface dwellers
- 12. solid material dissolved in water
- 13. temperatures just a few degrees above freezing
- 14. sources of sea salts

- 15. the transfer of energy through organisms
  - 16. maor constituent of seawater
  - 17. no sunlight; sparse life
- ## Down
- 2. area where land and ocean meet and overlap
  - 3. animals capable of moving independently of ocean currents

- 4. 18% of ocean layering
- 6. density increases rapidly with depth
- 7. mass unit per volume
- 8. most live in darkness in deep water
- 9. higher ocean temps founds in these regions
- 11. process that increaces salinity
