

Name: _____

Date: _____

On the First Day of Christmas, My rehab gave to me:

Across

1. Specialized equipment that provides body weight-supported ambulation and robotics to help patients safely relearn natural walking patterns
6. CMS 13 Diagnosis, having a limb removed
7. Minimum physician visits per week in acute rehab
9. Minimum physician visits by physician per MONTH in SNF
10. Hours per week of therapy in a SNF
11. Therapy used to help patients regain swallowing ability

Down

2. Measurement that shows pts progress in rehab
3. Equipment used to help patients regain function of their leg or hand due to stroke, multiple sclerosis, or other central nervous system disorders
4. Most every pt with this neurological condition causing hemiparesis, aphasia, and swallowing difficulties should be offered acute rehab
5. Hours of therapy a week in acute rehab
8. FIM point gain expected in acute rehab
