

# Organelles

## Across

**2.** Where ribosomes are made

**9.** Help in cell division... only in animal cells

**10.** Makes Proteins

**11.** Passage-ways.. help transport Ribosomes

**12.** Stores food and water larger in plant cells

## Down

**1.** Where the genetics material is found

**3.** power house converts food into energy

**4.** Allows substances in and out of the cell

**5.** Gel-like material that holds the organelles

**6.** Mailroom receives proteins and packages/delivers them to parts of the cell

**7.** Protects and supports plant cells

**8.** The control center for the cell
