

Organelles

Across

- 1. What helps vesicles and other organelles move through the cell?
- 9. What is the site of lipid production?
- 10. What organelle is break down materials for the cell to reuse?
- 12. What animal organelle stores water, nutrients, and waste?
- 13. What is the site of protein production?

- 14. What prouduces energy from glucose?
 - 15. What plant organelle stores water, nutrients, and waste?
- Down**
- 2. What organelle transports protein from the ER to the golgi body?
 - 3. What stores DNA and controls cell activities?
 - 4. What controls movement of materials in and out of the cell?

- 5. What makes glucose through photosynthesis?
- 6. What is the jelly-like substance that supports and protects the organelles?
- 7. What packages and ships protein to their destination?
- 8. What provides support and protection for the cell?
- 11. What organelle prouduces protein?

Word Bank
