# Organelles of a Cell

## Across

- 1. substance of nucleus consisting of DNA
- 3. holds enzymes created by cell
- 4. Deoxyribonucleic Acid
- 9. structure that makes protein
- 11. the shape of a prokaryotic cell
- 13. the main control center

- 15. makes the plant green

- 16. tail of a prokaryotic cell
- 17. transports proteins and lipids

- 18. breaks down food

## Down

- 2. the wall on the outside of cells
- 5. bubbles that store food

- 6. fluid enclosed structure in a cell

- 7. incloses the cell's structure

- 8. rounded body in the nucleus

- 10. gives shape to eukaryotic cells

- 12. a nuclear membrane consisting of genetic material

- 14. the liquid part of cell membrane
