

# Organic Chemistry Quiz

## Across

3. A saturated hydrocarbon.  
8. An atom or group of atoms responsible for properties of an organic compound.  
10. All organic compounds contain this element.

## Down

1. The type of bond formed in organic compounds.  
2. The suffix for a carbon chain with a triple bond.  
4. Organic compounds known as "smellys".  
5. The prefix for four carbon atoms in a chain.  
6. The primary aromatic hydrocarbon.  
7. Compounds that have the same molecular formula but different structures.  
9. An organic compound containing one or more hydroxyl (OH) groups.
