

# Origins of life

## Across

3. gets its energy from the sunlight plants?

5. no nucleus?

8. The first scientists to show that inorganic molecules could produce organic molecules

9. provides power

10. Scientist that did an experiment with flies and meat?

11. life comes from other life term

12. does not require oxygen?

13. Scientist that did an experiment with microorganisms?

## Down

1. has a nucleus?

2. energy from others?

4. The first genetic material was most likely a?

6. requires energy

7. prokaryotes evolve into eukaryotes
