

# Our Solar System

**Across**

- 4. Closest planet to the sun
- 6. Second largest planet in the Solar System
- 8. Rocky objects moving through space
- 10. Not considered a planet anymore

11. 8th planet from the sun

12. Hottest planet

**Down**

1. Largest planet in the Solar System

2. Planet that orbits sideways

3. Small objects with irregular orbital paths

5. "The Red Planet"

7. Home planet

9. Objects in space made of ice, dust, and other particles
