# Our Solar System

## Across

2. I am a powerful storm or eruption of gasses on the sun's surface that produce a large amount of energy.  
 4. I am a star and the group of planets and other objects that orbit the star.  
 7. I am a substance that is neither liquid or solid.  
 11. I am to spin or turn in a circle on an axis.  
 12. I am a bowl-shaped dent in the surface of Earth, planets, or moons, caused by falling meteorites.  
 13. I am a small object made mainly of ice and dust.  
 14. I am loops of gas, like ribbons, that are from the surface of the sun.  
 16. I am the force that an object has to pull things toward it.

18. I am a curved path in which an object in space moves around another object.

20. I am dark areas on the surface of the sun.

21. I am a real or imaginary line through the center of a spinning object.

22. I am any planet's natural satellite.

23. I am an amount of power.

## Down

1. I am a large, sphere-shaped object in space that orbits the sun.

3. I am a rocky or metal object that orbits the sun. I am not a planet.

5. I am a huge ball of gas in space that produces a massive amount of light and energy.

6. I am the large area between mars and Jupiter where most asteroids are found.

8. I am an unmanned spacecraft built to travel far into space to explore the planets and stars.

9. I am gasses surrounding a planet.

10. I am a rocky object that orbits the sun and is smaller than an asteroid.

15. I am a person who uses scientific processes and is involved in the study of science.

17. I am a device that uses lenses and mirrors to create a larger image of a faraway object.

19. I am a round object shaped like a ball.
