# Periodic table

## Across

2. this element has an atomic mass of 271  
 4. this family contains the element "Strontium"  
 5. Atomic mass of 195.084  
 7. This family contains the element "Neon"  
 8. Has 8 valence electrons  
 11. The father of the periodic table  
 14. Cn

## Word Bank

Seaborgium  
 left and right  
 potassium  
 Gold  
 Sodium

Silver  
 Halogens  
 Halogen Family  
 Dmitri Mendeleev  
 up and down

Copernicium  
 Alkaline earth metals  
 Noble Gases  
 Lanthanides  
 Alkali metals

Platinum  
 Noble gases  
 Lead  
 Calcium  
 Helium

15. The direction that periods go  
 17. this family Contains the element "Praseodymium"  
 19. the direction that families go  
 20. This family has non-metal germ killers  
Down  
 1. it is used in balloons

3. These metals are soft, silver colored, and react to air and water  
 6. its in cows milk  
 9. its in salt  
 10. It has 47 protons  
 12. Its in bannans  
 13. Pb  
 16. it has 79 protons  
 18. has 7 valence electrons
