# Photography Review

## Across

2. In photoshop, to edit a photos to make sure the colors are really coming through we use
3. The overall feeling a photograph gives with the use of color and other composition techniques
7. The tool you could use to make an image brighter if it is underexposed
8. The button that looks like a trash can on your camera

9. Different ways to focus on the subject (such as using light, color, or shape)

11. The 'A' in AV mode on your camera

12. How much light gets on the image (Can be over or under)

## Down

1. Composition technique where you break the image down into three spaces horizontally and vertically

4. The button on the camera that adds more light in a photo

5. To make sure that you are in control of all the elements of taking the photo, your camera should be set on \_\_\_\_\_ mode/function

6. In photoshop, the tool that allows you to adjust what is seen in the image

10. Button that takes the picture
