

Physical Geography

Across

2. What do we call submerged ridges of offshore sand?
3. There are 3 types of plate margin: constructive, destructive and
5. What do we call water that is stored in the soil?
9. A huge volcano
12. What type of tree is Mahogany?
13. Where you reduce the severity of events
16. A large scale ecosystem
17. What type of system is a sediment cell?

18. A graph plotting river discharge vs time

19. A process where sediments are carried in the water body?
22. Mudflow composed mainly from volcanic ash
23. What is created when the sea floods a deep glacial trough?
24. What do we call an uncontrolled fire?
25. What volcano did we study from Iceland

Down

1. What is the largest Ocean in the world?
4. What is released as animals die?

6. How many large sediment cells are there around the UK?

7. A state of balance where inputs equal outputs in a changing system.
8. The movement of tectonic plates as a result of gravity.
10. What is the capital city of New Zealand?
11. Coastal ecosystem formed on mudflats -comprises of tolerant plants
14. What type of engineering is Rock armour?
15. A ridge of sand that has formed between an island and the mainland.
20. In which continent is Moldova?
21. What is the main Oil reserve in Nigeria?
