

Name: _____

Date: _____

Physical Science Vocabualry

Across

3. The region of the atmosphere between altitudes of roughly 80 kilometers and 460 kilometers

5. The symbol chemists use for mercury

10. The region of the atmosphere that spans altitudes of roughly 11 kilometers to 48 kilometers

11. The region of earths atmosphere that extends from ground level to roughly 11 kilometers above sea level

12. Energy that is transferred as a consequence of temperature differences

13. The upper layer of earths atmosphere

14. The region of the atmosphere between the altitudes of roughly 65 kilometers and 330 kilometers

15. The region of the atmosphere above an altitude of roughly 460 kilometers

Down

1. The lower layer of earths atmosphere

2. The pressure exerted by the atmosphere on all objects within it

4. The mass of air surrounding a planet

6. The region of the atmosphere that spans altitudes of roughly 48 kilometers to to 80 kilometers

7. A measure of the energy of random motion in a substances molecules

8. An instrument used to measure atmospheric pressure

9. Narrow bands of high-speed winds that circle the earth , blowing from west to east
