

# Physical features of South Africa

## Across

1. area of steep slopes that divides coastal plain from the plateau

4. a large natural elevation of the earth's surface rising abruptly from the surrounding level

8. a piece of land surrounded by water.

9. a broad inlet of the sea where the land curves inwards.

10. a low area of land between hills or mountains

11. a surface of which one end or side is at a higher level than another

12. large flat area with steep sloped sides between 1000m and 2000m high

13. a length of water joining two larger areas of water, especially two seas

## Down

2. flat area of land near the coast

3. an object or feature of a landscape or town that is easily seen and recognized from a distance, especially one that enables someone to establish their location.

5. piece of land that sticks out into the sea

6. a waterless, desolate area of land with little or no vegetation, typically one covered with sand.

7. a naturally raised area of land, not as high as a mountain.
