

# Physics

## **Across**

- 3.** power that comes from physical/chemical resources
- 8.** a minute portion of matter
- 9.** The branch of science concerned with properties and energy
- 10.** the smallest particle of a chemical element that can exist
- 11.** the great size or extent of something

## **Down**

- 1.** an area in space that sucks in matter with a gravitational pull
- 2.** a word that categorizes colour, length, volume, odour and density in one area
- 4.** distortion of an image by a lens or mirror
- 5.** capacity to increase speed
- 6.** a large body of matter with no define shape
- 7.** expands outwards in space (reverse of black hole)
