

Physics Hidden Words

Across

- 3. path of a projectile
- 4. a point to use for comparison to judge movement
- 7. shape of a projectile when launched at an angle
- 8. how fast an object is moving
- 9. any object thrown into the air under the sole influence of gravity; air resistance is negligible

10. is an object which is falling under the sole influence of gravity

Down

- 1. is the total distance traveled divided by the time interval
- 2. specific speed/ velocity at exact time
- 5. is the total displacement traveled divided by the time interval during which the displacement occurred
- 6. ratio changing position over change of time plus direction
