

Physics Review

Across

- 3. The energy carried by light
- 6. The amount of matter in an object
- 7. The energy of working
- 8. The energy of movement
- 12. A push or pull
- 13. The force that opposes motion
- 15. The energy associated with the vibration of matter
- 16. The speed and direction of moving objects
- 20. The type of energy stored in chemical bonds

- 21. To bring something closer to yourself

- 23. How long wave is
- 25. A change in velocity and a change of speed and/or direction
- 26. A smooth and continuous wave

- 27. The bottom of a wave

Down

- 1. The possibility of falling
- 2. The rule that says that energy can't be created or destroyed
- 4. Energy stored in elastic material due to stress
- 5. The energy contained in atomic nuclei

- 9. A force going up

- 10. A stored energy waiting to be released

- 11. The length of the elastic pulled back

- 14. The energy that moves particles and causes heat

- 17. The type of energy carried by electrical currents

- 18. It is made of ones and zeros

- 19. To bring something farther away from yourself

- 22. The top of a wave

- 24. The distance traveled per unit of time
