

Physics Vocab Project

Across

2. A quantity with direction and magnitude

9. The amount of space something travels

11. The rate at which something is able to move or operate

12. When the only force acting on an object is gravity

13. A prediction or educated guess

14. Speeding up, slowing down, or changing direction

15. The application of scientific knowledge for practical purposes

Down

1. The place something is located

3. An observation that has been confirmed repeatedly and accepted as true

4. An idea to explain something

5. The speed of something in a given direction

6. The distance something travels from its starting point

7. Knowledge dealing with a body of facts or truths

8. A quantity with only size

10. A statement based on repeated experimental observations that describes some aspect of the world
